Montréal, QC, Canada

Personal Profile

I'm a Software Engineer with 10 years of experience delivering high quality and innovative mobile and web products, 8 of them doing web development (both front-end and back-end) and 2 developing mobile apps (both on iOS and Android). Strong experience working in the retail sector.

Work Experience

Senior Full-stack Developer

ReelFX(Montréal, QC) Sept 2020 - present

Worked on adding new features and maintaining internally used applications for an animation studio.
- Took ownership of 7 applications that the company uses on day to day operations.
- Developed new features for legacy code with little to none documentation to rely on how the system works.
- Developed a React web app for listing and applying to open positions.
- Assumed on-call engineering duty when necessary.
- Mentored junior developer.

Mobile Application Developer

Europiel Aug 2019 - Sept 2020

Lead Programmer on a new mobile product using voice recognition software related to consumer and business travel.
- Reviewed client requirements and designs to translate them into implementable user stories and made architecture decisions based on those requirements.
- Developed an iOS travel related application from scratch using Swift.
- Developed the backend in Node.js for the travel related application.

Full-stack Developer

Softtek Jan 2016 - Aug 2019

Worked on a project called Click2Sync that provides synchronization solutions for sellers, focusing primarily on marketplaces like Amazon, eBay and Mercadolibre.
- Developed modules to integrate the web app to eBay, Mercadolibre, Prestashop and Facebook Ads.
- Redesigned the front-end of the web app of Click2Sync.
- Developed a custom integration to an ERP using C++.
- Developed iOS app for capturing products information.

Education

Universidad Regiomontana
Bachelor's degree, Software Engineering
2010 - 2014

Interests
- Learning Go and making an Interpreter
- Reading
- Writing
